

Teflon-coated changeable gluepot

The individual machine aggregates can be switched on and off easily from the clearly laid out control panel.

The patented height adjustment of the upper pressure bar is carried out using a handle.

The biggest advantage of the combination unit is the considerably short machine length.

Super finish for ABS and PVC edging material. The machine can optionally be equipped with spraying equipment to apply polish onto the buffers.

New edition of the Felder G 300 Edgebanders

With the new changeable gluepot, the flexibility and productivity of larger edgebanders can also be achieved with the Felder Series G 300 models. The quick and easy change to other adhesive colours and the use of PUR glue guarantee productive procedures and excellent edges for all areas of application.

The advantages at a glance

- ✓ Quick-Set system for quick adjustment to different material thickness
- ✓ Compact design with smallest space requirement
- ✓ Excellent price to performance ratio
- ✓ Teflon-coated changeable gluepot for 1.2 kg adhesive granulate
- ✓ Adhesive and colour change in only a few seconds

G 300 Series	G 330	G 360	G 380
Installation length	2445 mm	2830 mm	
Tape thickness	0.4–5 mm		
Piece thickness	8–50 mm		
Automation	Quick-set System		
Aggregates	Chain feed, gluing unit, end trimming unit (G 380: with straight or radius cut), premilling unit (only with G 360/380), multifunction trimming unit, radius scraper, flush scraping unit (optional), buffing unit
